

## Physics 11 Work Power Energy Worksheet Answer Key

Eventually, you will definitely discover a new experience and skill by spending more cash. nevertheless when? complete you recognize that you require to acquire those all needs similar to having significantly cash? Why don't you try to get something basic in the beginning? That's something that will guide you to comprehend even more more or less the globe, experience, some places, with history, amusement, and a lot more?

It is your extremely own era to take steps reviewing habit. accompanied by guides you could enjoy now is physics 11 work power energy worksheet answer key below.

Work, Energy and Power Class 11 Notes Physics Chapter 6. \u2022 Work is said to be done when a force applied on the body displaces the body through a certain distance in the direction of applied force. It is measured by the product of the force and the distance moved in the direction of the force, i.e.,  $W = F \cdot S$ .

In physics, however, the word \u2022Work\u2022 covers a definite and precise meaning. Somebody who has the capacity to work for 14-16 hours a day is said to have a large stamina or energy. We admire a long distance runner for her stamina or energy. Energy is thus our capacity to do work . In Physics too, the term \u2022energy\u2022

Instantaneous power in terms of mechanical energy:-  $P = dE/dt$ . Units: The unit of power in S.I system is J/s (watt) and in C.G.S system is erg/s. Energy:-1) Energy is the ability of the body to do some work. The unit of energy is same as that of work. 2) Kinetic Energy (K):- It is defined as,  $K = \frac{1}{2} mv^2$
